

Automatic Self Closing Mechanism For Scrigno Sliding Pocket Door Kits

Product Images

Description

- Kit Dinamico – dynamic automatic door closer mechanism to suit the Scrigno sliding pocket door systems.
- Once the sliding door has been opened this device makes the door close by itself, using an ingenious system which is completely enclosed inside the frame.
- Easy to install - Can be installed retrospectively (Please note: when retro-fitting accessories, the architrave cross piece may need to be removed).
- Suitable for doors up to 40kg in weight.
- **Once fitted this will reduce the clear opening by 50mm.**
- **Suitable for use with the Scrigno sliding pocket door systems only.**
