

Heavy Duty Finger Protector Hinge Guard - For Front Opening Push Side Fitting - 1950mm Length

Product Images

Short Description

- Our heavy duty finger protector guards are a flexible safety strip which prevents fingers being trapped on the push side of the door, when fitted the gap is covered completely, This heavy grade finger protector guard is suitable for heavy pedestrian traffic such as schools and nurseries.
- Manufactured from PVC Nitrile, this finger protector once installed requires no maintenance other than a wipe down with a damp cloth for

cleaning.

- With an aesthetically pleasing slim-line design this finger protector is easy to install, requiring no specialist tools or equipment. Self-adhesive backing strips are used to position the finger guard holding strips, which are then reinforced by screws (supplied), neatly concealed by the guard design. Cover strips, used to conceal the fitting screws (supplied) are colour matched to the guard.

Description

- Heavy duty finger protector hinge guard - for front opening push side fitting.
- Hinge guards provide finger protection for doors which are simple and cost effective devices that cover the gaps created when doors are opened.
- These finger protectors fit most doors and are simple to install.
- Finger protectors are unobtrusive, and will in no way impede the opening and closing of any door.
- Slim-line design - once fitted it is hardly noticeable.
- finger protectors are suitable for areas of medium pedestrian traffic.
- Suitable for butt hinged or pivot doors.
- Flexible - will not split or tear.
- Up to 180 degree opening.
- Improves acoustic and draft proofing performance.
- Can be screw fixed to allow easy hinge maintenance, easy to install, no specialist tools or equipment required.
- Supplied with high performance self adhesive tape.
- Our finger protectors are easy to clean and requires no maintenance.
- Heavy duty rear pull side fitting hinge guard also available see related products or search for 40902.

Fitting Position:

- Front opening push side fitting.

- This heavy duty hinge guard can also be used on double action pivot doors as shown below:

Finishes:

- White PVC
- Brown PVC

Dimensions:

- 1.95 metre (1950mm) lengths.
- Easily cut to length for smaller door sets.

Areas of application:

- Suitable for fire rated and non fire rated doors.
- Suitable for timber, steel or composite doors.
- Suitable for doors with a maximum opening angle of 180 degrees.
- Ideal for nurseries, schools and residential care homes

Fitting Instructions:

- 1. Offer up the 1.95m heavy duty finger guard for size.

- 2. If you need to cut to length leave 10mm clearance top and bottom. Use a hacksaw to cut rigid profiles and sharp scissors or knife to cut flexible shield.
- 3. Ensure that the surfaces that are to be adhered to are free from dust or grease.
- 4. Draw a line vertically down the door 60mm from the hinge edge (see fig 1).
- 5. Crimp bottom end of rigid socket with pliers prior to fitting - can be done post fit with hammer and centre punch (see fig 5).
- 6. Remove tape backing from door side rigid profile and stick in position with outer edge on drawn line (see fig 2).
- 7. Remove tape backing from other rigid profile and stick in position on door jamb (see fig 2).
- 8. Using screws provided fix both sides of Little Fingers Heavy Duty in positioning with a screw every 150mm and with one no more than 25mm away from top and bottom (see fig 3).
- 9. Clip screw cap cover in place (see fig 4).
