

## Heavy Duty Finger Protector Hinge Guard - For Pull Side (Knuckle Side) Fitting - 1950mm Length

### Product Images

### Short Description

- Our heavy duty finger guards are a flexible safety strip which prevents fingers being trapped on the pull / knuckle side of the door, when fitted the gap is covered completely, This heavy grade finger guard is suitable for heavy pedestrian traffic such as schools and nurseries.
- Manufactured from PVC Nitrile, once installed requires no maintenance other than a wipe down with a damp cloth for cleaning.
- With an aesthetically pleasing slim-line design this finger guard is easy to install, requiring no specialist tools or equipment. Self-adhesive backing strips are used to position the guard holding strips, which are then reinforced by screws (supplied), neatly concealed by the guard design. Cover strips, used to conceal the fitting screws (supplied) are colour matched to the guard.

## Description

---

- Heavy duty finger protector hinge guard - for pull (knuckle) side fitting.
- Hinge guards provide finger protection for doors which are simple and cost effective devices that cover the gaps created when doors are opened.
- These devices fit most doors and are simple to install.
- Finger protectors are unobtrusive, and will in no way impede the opening and closing of any door.
- Slim-line design - once fitted it is hardly noticeable.
- Suitable for areas of medium pedestrian traffic.
- Suitable for butt hinged or pivot doors.
- Flexible - will not split or tear.
- Up to 105 degree opening.
- Improves acoustic and draft proofing performance.
- Can be screw fixed to allow easy hinge maintenance, easy to install, no specialist tools or equipment required.
- Supplied with high performance self adhesive tape.
- Easy to clean and requires no maintenance.
