
BIAS Single Direction Anti-Slam / Soft Close Mechanism To Suit Eclisse Classic / Syntesis / FD30 & 8mm Glass Sliding Pocket Door Systems - For Doors Up To 40kg In Weight

Product Images

Description

- Anti-Slam / soft close mechanism to suit Eclisse sliding pocket door systems.
- Compatible with the following Eclisse pocket door kits:
 - Classic kit
 - FD30 fire rated kit
 - Syntesis architrave free fit
 - 8mm glass door kits
- Better than an ordinary soft-close, the BIAS has anti-slam technology.

- Fitting a soft close to a pocket door has the advantage of bringing the door to a close gently and quietly when you slide it closed, but it can still be slammed into the door post if a greater force is used.
- Fitting a BIAS Soft Close with Anti-Slam has the greater advantage of bringing the door to a controlled close gently and quietly even when more force is used and the door is slammed shut.
- Easy to install - Can be installed retrospectively.
- Suitable for doors up to 40 kg in weight.
- **Suitable for use with Elisse sliding door systems only**
