

Zero Clearance Low Headroom Sliding Door Track Kit - For Timber Doors Up To 80kg In Weight

Product Images

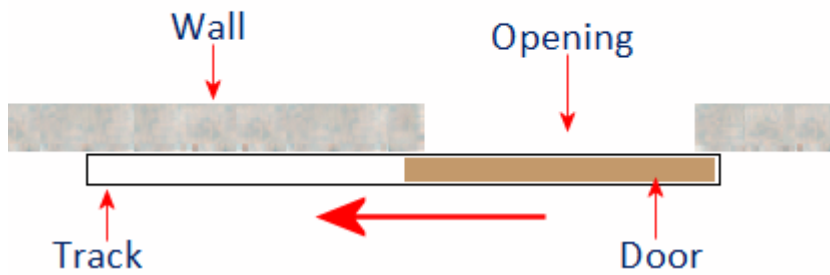

Description

- Zero clearance sliding door system is designed for use on timbers doors up to 80kg in weight.
- Low headroom solution, the door hangers are rebated into the top of the door allowing the door to be between 2.5mm - 5mm below the bottom of the track.
- Pre-finished track and small distance from the top of the door to the bottom of the track means no pelmet is required,
- Track can be rebated into the ceiling to create a discrete sliding door.
- Suitable for use for sliding doors between rooms, wall openings or entrances.
- Each set includes all the main components needed to install a long lasting, smooth running soffit (ceiling) mounted zero clearance sliding door track.
- Anodised aluminium pre-drilled track for a durable, long lasting finish and easy installation.
- Suitable for wooden doors only.
