

Soft Close Mechanism To Suit The Zero Clearance Sliding Door Kit

Product Images

Description

- Soft close mechanism for the Zero clearance low headroom sliding door kit.
- The damper or "soft-close" unit catches the door in the last few centimetres and gently pulls it into the fully closed position thus avoiding slamming which alleviates stress on the surrounding door frame and helps prevent finger traps.
- Suitable for doors up to 80 kg in weight.
- Can be used on the closing side, opening side or both sides if two mechanisms are purchased.
