- Minimum load 0 W per module. Maximum load 120 W per module.
- Suitable for most quality dimmable LED lamps.
- Compatibility is not guaranteed with all LED bulbs.

Box Depth

- When installing electrical accessories it is important to ensure that wall boxes of adequate depth are used.
- The box depth should comfortably accommodate the accessory and its connecting cables, and is particularly important with flat plate ranges and power accessories.
- The product selector table above gives recommended box depths for normal installation conditions.
