

Scrigno Sliding Pocket Door Cassette System - Single Glass Door Kit - 125mm Finished Wall Thickness

Product Images

Description

- The Scrigno (pronounced Scree-nio) glass sliding door gear system uses a pre-fabricated cassette system to create a single sliding pocket door.
- Unlike most other pocket door solutions available today, Scrigno systems come pre-fabricated. Just drop the supplied aluzinc cage into place, plaster over the opening and then you're ready to install the door of your choice on the hangers and sliding track provided.
- Allows an interior door to slide and disappear into a "pocket" within the wall cavity.
- Each set includes all the main components needed to install a long lasting, smooth running sliding door including a pre-made steel cassette pocket which is used to create the wall cavity or "pocket" for the door to slide into.
- This high quality sliding door gear is suitable for residential and commercial applications. The unique design allows glass doors between 8 - 10mm thick to be installed with a finished wall of 125 mm.
- Supplied as a kit to create the pocket, which can be fully fitted in under 60 minutes by a skilled installer.
- Suitable for doors up to 120kg in weight.
- Suitable for use with glass doors only - glass **door not included**.
- The Scrigno system comes supplied **complete with timber lining - jamb kits**.

Accessories Available To Suit The Scrigno Single Pocket Door System

- Soft close mechanism - to dampen softly close the sliding door. - **(sold separately)**.
- Self closing mechanism - automatically pulls the door closed each time the door had been opened. - **(sold separately)**.
