

## 5 Pin Anti Snap Euro Profile Single Cylinder - Pewter Finish

### Product Images

### Description

48585

- 5 pin - Euro profile single cylinders with key operation from one side only.
- Euro cylinders are the "barrels" that go through the middle of a door, commonly found on UPVC front doors.
- Low security range with a high quality architectural finish.
- Ideal for use on internal cupboard doors where the door only needs to be locked from the outside.

- Commonly used with Euro profile mortice night latches and outside access devices (OAD's).
- Supplied with 3 keys.

## Operation

- Single cylinder - key operation from the outside side of the door only.
- The door can be locked and un-locked by turning the key from the outside only (with single cylinders there is no facility to lock a door from the inside).
- Comes supplied with 3 keys and a cylinder fixing screw.
- Key differed - if ordering more than one, the cylinders will come with different keys.
- Suitable for use on wooden, UPVC and metal doors.
- Must be used in conjunction with some form of Euro profile mortice lock or multi-point locking system. (Sold separately)

## Security Level

- Basic security with 5 pins.
- Tested to BS1303 and is "Anti Pick", "Anti Snap" and "Anti Bump".
- Best used on internal doors where low security is acceptable.
- Can be fitted to external doors where security isn't a high priority.

## Finish

- Pewter finish

## Dimensions

All measurements in mm

Item Code	Overall Length (A)	External Side (B)	Internal Side (C)
48585.1	45mm	35mm	10mm
48585.2	40mm	30mm	10mm

## Fitting Information

- For security reasons it's best where possible to have the Euro cylinder finish flush (flat) with the edge of the escutcheon or backplates of the handles fitted to the door.
- Cylinders that stick out past escutcheons and backplates of handles are much more vulnerable to attack as they can more easily be hammered, twisted or cut during an attack.

# Standards This Product Conforms To

- These 5 pin Euro profile cylinders have been included on a successful fire test to BS EN1634: Part 1 2000 - Assessed for use on 30 minute and 1 hour fire doors FD30 / FD60.

# Options Available To Order

- **Keyed Alike (KA)** - A batch of cylinders all under the same one key.
- **Under Master Key (UMK)** - A batch of cylinders all under different keys with one master key which operates any of the cylinders.
- Please contact us for more information and lead times and prices for the above options.

# Unit Of Sale

- Each - (1x cylinder with 3x keys and 1x fixing screw.)
