

Single Locking Door (Office / Room) With Electromagnetic Free Swing Door Closer - Ironmongery Kit - Suitable For FD30 & FD60 Fire Doors - Satin Stainless Steel Ironmongery

Product Images

Description

Our single locking room door kit is ideal to specify or purchase for single doors in blocks of flats, offices, schools, hotels and hospitals.

This key locking kit is supplied with a sash lock, euro cylinder (with internal thumbturn) and a pair of grade 4 return to door lever handles.

Supplied with a unique swing-free door closer developed specifically to meet the needs of care home facilities. In a class of its own, this closer offers specific features that reduce the risk of injury to residents as well as eradicating the need to wedge doors open.

ANTI-SLAM: The swing-free mode of a closer can allow a door to slam shut. Whether this is accidental, deliberate, or just caused by a draught, it poses a real risk to frail residents. This closer has been specifically developed with an anti-slam function that controls and slows the motion of the door.

DRIFT RESISTANCE: Offers a low-level control on the door, which stops it from drifting from its open position – eradicating the need to wedge doors open, yet still allowing the door to operate freely to the user.

High performance ironmongery including grade 14, concealed nylon bearing fire rated hinges (maintenance free with no grease) and a high quality EN1154 2-5 power overhead door closer.

Products tested for use on 30 minute FD30 and 60 minute FD60 timber fire rated doors and frames.

- Our FD30 kit is supplied with **1mm** thick intumescent hinge pad liners

- Our FD60 kit is supplied with **2mm** thick intumescent hinge pad liners.
