
Spoon End Design - Locking Wedge Pattern Window Fastener - Suitable For Weather Stripped Windows - Polished Nickel

Product Images

Description

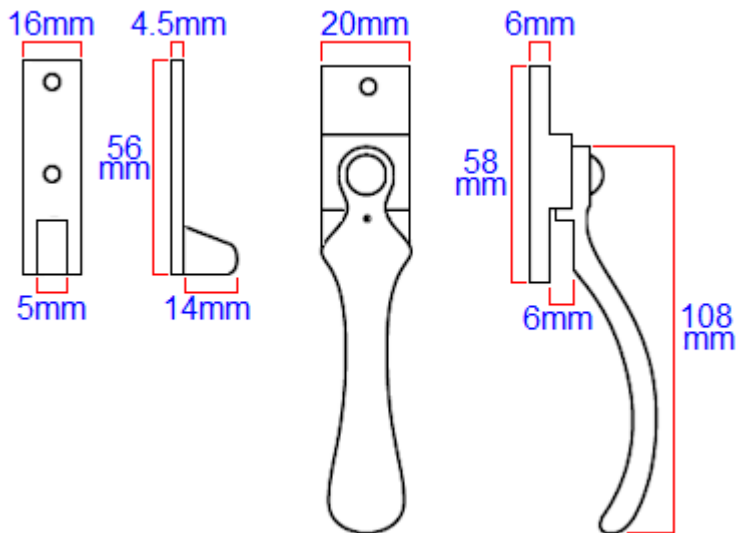

- Spoon end design wedge pattern locking window fastener
- Key lockable via an alun key and grub screw - low level security
- This fastener can be locked by screwing the grub screw into the fastener with the alun key provided. This stops the fastener from moving hence stopping the window from being opened

- Wedge pattern fastener - when in the closed position the window handle sits over a "wedge plate" mounted to the window frame, this pulls the window in with a nice tight seal and keeps it held closed
- This fastener is reversible so can be used on windows hung on the left or right
- Suitable for use on weather stripped (draught proofed) timber windows

Finish

- Polished Nickel

Dimensions

- Back Plate - Height - 58mm x Width - 20mm
- Handle Length - 108mm
- Wedge Back Plate - Height - 51mm x Width - 16mm
- Step Distance - 6mm
