- Please note most cabinet handles have an internal thread of approximately 4mm - 5mm for the M4 bolt to screw into.

Base Material

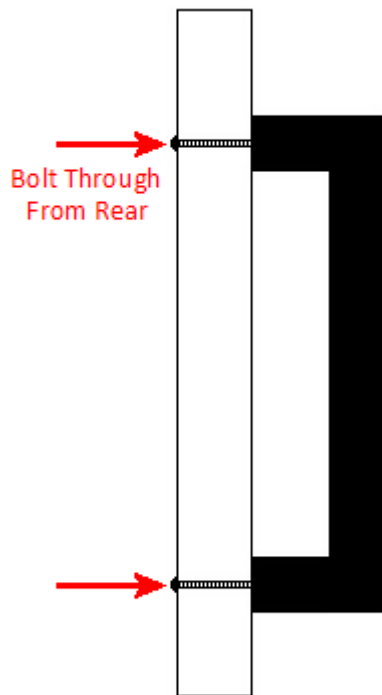

- M4 Bolts are made from a zinc alloy.

Finish Details

- Bright zinc plated finish - (shiny silver colour)

Fixings

- M4 bolts are designed to bolt through from the rear of the door / drawer and screw into the back of a cupboard handle or cabinet knob with a M4 thread.

- 4.5mm diameter hole is required for the M4 bolts to go through.
- Pan head - no need to countersink M4 bolt into the wood.
- Bolts can be cut down with a junior hacksaw if required.
- For fixing cupboard knobs back to back please see M4 stud in the related products section below.

Sold Per

- M4 fixing bolts are sold individually - (Each)
