
Architectural Quality - Locking Window Fastener - Satin Nickel

Product Images

Description

- Heavy architectural quality
- Wedge pattern locking window fastener
- Spoon shape handle
- Key lockable via alun key

- Fastener can be locked by screwing the grub screw into the fastener with the alun key provided. This stops the fastener from moving hence stopping the window from being opened
- A casement fastener is fixed on the side of the window and is the handle used to keep the window closed
- This fastener is reversible so can be used on windows hung on the left or right

Finish

- Satin nickel

Dimensions

- Back Plate - Height - 58mm x Width - 20mm
- Overall Height - 130mm
- Wedge Back Plate - Height - 51mm x Width - 16mm
- Wedge Tag Length - 18mm

Important Info Before You Buy

- Suitable for wooden windows
- For use on standard outward opening windows only
- This fastener is a wedge pattern. The wedge plate provided is fitted to the window frame and is used in place of a traditional mortice plate
- Comes supplied with fixing screws, wedge plate, grub screw and alun key
- Matching window stay also available.
