

Eclisse Self Closing Door Mechanism - To Suit Eclisse Single Sliding Pocket Door Systems

Product Images

Description

- Self Closing Mechanism To Suit Eclisse Sliding Pocket Door Systems.
- Once the sliding door has been opened this device makes the door close by itself, using an ingenious system which is completely enclosed inside the frame.
- Closing speed can be adjusted without removing the door or jambs.
- Can be used in conjunction with the Eclisse soft closing mechanism to allow the door to quietly and softly close in to position.
- Suitable for doors up to 40 kg in weight.
- **Suitable for use with Eclisse sliding door systems only.**
