

Eclisse Double Door Co-ordination Kit - For Use With Eclisse Double Door Systems

Product Images

Description

- Double door co-ordinator mechanism to suit Eclisse sliding double door pocket door systems.
- With this system the **opening/closing of the two doors is linked** so as you open or close one door, the other one opens or closes.
- The system can be installed in existing counterframes because the Eclisse system has patented extractable tracks which allow you to remove them and install the coordination system.
- The cable used in this system has been specially developed by Eclisse for its strength and resistance to stretch over time. It's a 132 strand, 2mm stainless cable complete with a zinc plated 1.5mm spring.
- The cable is attached to the door by means of a bracket installed centrally on top of the door.
- This set includes a soft closer which will slow down the doors and close them if the doors are no more than 25 kg each. Heavier doors will just be slowed down,
- **Suitable for use with Eclisse sliding door systems only.**
