

Dorgard - Fire Door Hold Open Device - Black

Product Images

Description

Dorgard is the intelligent fire door hold-open device that listens for a continuous fire alarm sound level of over 65 decibels

- Black Finish
- After approximately 14 seconds Dorgard will release, allowing the fire door to close under the pressure of the overhead door closure
- Dorgard requires no wiring as it is battery operated and self-contained
- Dorgard is fitted to your fire door with four screws and takes just minutes to install
- It is accepted for use by fire authorities and complies with all relevant BS standards
- Automatic fire door release when fire alarm sounds
- Inexpensive to buy and fit
- Installs in under five minutes
- Easy, foot-operated manual release/adjustment operation
- Automatic night-time release facility
- Reliable, acoustic detection
- Smart, unobtrusive design
- Battery lifetime exceeds fire safety policy directive
- Integral power-on LED indicator
- Low battery, automatic door release
- Optional floor plate for especially heavy doors/slippery surface
- Complies fully with all relevant British Standards, EC Directives and UK Workplace Regulations (Fire Precautions) 1997
- CE rated
